[12.2.5] Does your university as a body have policies around use minimisation - Of plastic?

NCUT's Commitment to a Plastic-Free Campus

National Chin-Yi University of Technology (NCUT) is deeply committed to environmental sustainability, leading efforts to reduce plastic use in alignment with government regulations and its own eco-friendly policies. NCUT's goal is not only to comply with environmental mandates but to foster a lasting culture of environmental responsibility among students, staff, and faculty. The university actively seeks to create a plastic-free campus through education, engagement, and proactive change.

Government Mandates and Compliance

NCUT recognizes the importance of following government directives, particularly those that restrict the use of plastic products. Taiwan's 2018 Single-Use Plastic Directive (SUPD) imposes restrictions on single-use plastics and oxo-degradable plastics. NCUT has embraced these guidelines as part of its legal and moral duty to reduce plastic waste and pollution.

Awareness and Education

Central to NCUT's mission is increasing awareness about the environmental impacts of plastic pollution. The university has launched comprehensive awareness campaigns, utilizing announcements, email notifications, and educational programs to inform the campus community about the need to reduce plastic usage. These campaigns focus on the harmful effects of plastic waste and promote the use of environmentally friendly alternatives.

Behavioral Change and Campus-Wide Engagement

Beyond awareness, NCUT is committed to inspiring lasting behavioral change among students, staff, and faculty. By promoting the reduction, reuse, and recycling of plastic products, NCUT encourages the adoption of sustainable habits. The university also provides alternatives to disposable plastic items, such as reusable lunch containers, water bottles, and eco-friendly materials.

The success of NCUT's plastic-free initiative depends on broad community involvement. NCUT encourages all members of the campus to actively participate in reducing plastic consumption. This collective effort helps to ensure that the transition toward sustainability becomes a shared responsibility.

Key Initiatives for Reducing Plastic Use

On October 3, 2022, NCUT demonstrated its dedication to sustainability by hosting a public briefing on reducing plastic lunch boxes and plastic bottles, in compliance with the Environmental Protection Administration's regulations. The briefing covered several key areas:

1. **Raising Awareness:** The event emphasized the environmental damage caused by excessive plastic usage, highlighting the importance of reducing plastic waste.
2. **Promoting Alternatives:** Attendees were introduced to sustainable alternatives to plastic lunch boxes and bottles, such as reusable containers and water bottles.
3. **Encouraging Behavioral Change:** The briefing offered practical tips and strategies to reduce plastic dependency, encouraging participants to adopt more eco-friendly habits.

Regulations on Single-Use Plastics

The SUPD mandates that public institutions, including private schools and welfare operations, must restrict the use of single-use plastics. NCUT follows these regulations closely, ensuring that plastic bags, lunch boxes, and plastic bottles are minimized or replaced with sustainable options in campus operations. This adherence is part of a larger, nation-wide effort to reduce the environmental impact of plastic products.

Environmental Stewardship

NCUT views its plastic-free campus efforts as part of its broader role as an environmental steward. The university recognizes its responsibility to protect the environment, not only for its immediate community but also as part of a global effort to reduce pollution and conserve resources.

Future Sustainability Goals

NCUT's commitment to sustainability goes beyond the present, with a vision for a greener, cleaner future. By reducing plastic lunch boxes and bottles, the university is paving the way for long-term environmental sustainability. Collaboration with external organizations, government agencies, and businesses is also key to amplifying these efforts.

Through its plastic-free campus initiative, NCUT is setting a powerful example of environmental leadership. By fostering a culture of sustainability, adhering to government regulations, raising awareness, promoting alternatives, and encouraging lasting behavioral change, NCUT is leading the way in creating a more eco-friendly and sustainable future for all.

Promoting Sustainable Living: Reducing Disposable Product Usage

National Chin-Yi University of Technology (NCUT) recognizes the urgent need to change people's living habits and cultivate the environmental protection concept of **"bring your own, reuse, and use less" when it comes to plastic products**. The overarching goal is to reduce the consumption of disposable items such as disposable tableware and packaged drinking water. By doing so, we aim to mitigate resource consumption and pollution, contributing to a more sustainable and environmentally conscious society.

Government-Led Environmental Initiatives

NCUT firmly believes that environmental issues should be championed by government organizations to set the example for society. The Environmental Protection Administration of the Executive Yuan has taken proactive measures to address the issue. They have formulated the "Guidelines for Administrative Organs and Schools to Reduce the Use of Disposable Tableware and Packaged Drinking Water." These guidelines serve as a roadmap for relevant units to follow and facilitate the promotion of sustainable practices.

1. **"Bring Your Own" Mentality:** The initiative encourages individuals to adopt a "bring your own" approach, where reusable containers, utensils, and water bottles become an integral part of everyday life. This reduces the reliance on disposable products.
2. **Reuse and Repurpose:** Emphasizing the value of reusing items such as containers, bags, and bottles helps minimize waste and the demand for new disposable products.
3. **Minimalism:** Encouraging people to use less, whether it's in terms of packaging, disposable tableware, or other single-use items, helps reduce resource consumption and waste generation.

Incorporating Environmental Education

NCUT recognizes that change starts with education. Therefore, the university is committed to incorporating the concept of environmental protection into its educational programs. By instilling environmental awareness in students, NCUT prepares the next generation to embrace sustainable living practices from an early age.

Promotion Across Sectors

To ensure the success of this initiative, NCUT is dedicated to promoting it **not only within its own campus but also across private units and the wider community**. By collaborating with external organizations, the university aims to create a ripple effect, with the principles of reducing disposable product usage gaining traction at various levels of society.

National Chin-Yi University of Technology's commitment to reducing the use of disposable products aligns with its dedication to environmental protection and sustainability. By adhering to the principles of "bring your own, reuse, and use less," the university seeks to lead by example and foster a culture of responsible consumption and waste reduction. Through collaboration with government organizations and the incorporation of environmental education, NCUT aims to drive positive change, promoting a more sustainable future for all.

Green University Promotion Committee Establishment Regulation of NCUT

Article 1 In order to conform to the spirit of sustainable campus, create an environmentally friendly, healthy and safe green university, and cultivate and educate global citizens who are willing to take on the responsibility of sustainable environment, the "Green University Promotion Committee of National Chin Yi University of Technology" is set up.

Article 4 The tasks of this committee are as follows:

1. Make suggestions for the university's promotion of green university policies.
2. Coordinate and suggest a sustainable development plan for the campus.
3. Discuss the promotion plan of life environmental protection.
4. Review issues concerning sustainable campus and community development.
5. Discuss other issues related to the promotion of green university issues.

國立勤益科技大學綠色大學推動委員會設置辦法

本校 97 學年度第 2 學期第 4 次行政會議討論通過

第一條 為符合永續校園精神，營造一個環保、健康、安全的綠色大學，培養及教育願意擔負永續環境責任之世界公民，特設置「國立勤益科技大學綠色大學推動委員會」（以下簡稱本委員會）。

第二條 本委員會置主任委員一人，由校長兼任，置副主任委員二人，由副校長兼任，置執行秘書一人，由總務長兼任。置委員若干人，由教務長、學生事務長、總務長、研發長、各學院院長、主任秘書、進修推廣部主任、附設進修學院教務主任、職員代表及學生代表共同組成；任期一年，並得連任。
